

DEFENSE AND SECURITY BATTERIES

DEPENDABLE POWER FROM A TRUSTED NORDIC SUPPLIER

At Celltech Group, we pride ourselves on being a leading Nordic supplier of comprehensive multi-technology defense power supply and battery systems. Our expertise spans from the smallest batteries for compact drones to large-scale batteries designed for large vehicle drivetrains, ensuring reliable power across a broad spectrum of military and industrial applications where failure is not an option. As part of a financially robust Swedish group of enterprises with over a century of operational history, we offer unmatched stability and trust in the supply of military-grade batteries.

VERSATILE MILITARY BATTERIES FOR DIVERSE EQUIPMENT

We offer an extensive array of military battery packs, from tiny batteries powering UAVs to UPS systems to massive batteries for heavy military vehicles. Our product range includes batteries from customized batteries tailored to meet specific operational needs all the way to standard batteries designed for general defense and security applications. Additionally, we represent some of the best-known global battery brands, extending their military battery offerings to our customers.

Our products undergo rigorous testing to ensure reliability and superior performance in various applications—from infantry communications to naval crafts and aircraft. Our scalable energy solutions keep military personnel connected, aware, and safe.

IN-HOUSE RESEARCH, DEVELOPMENT, AND MANUFACTURING

Our in-house R&D team continuously advances battery technology, enhancing design and performance. This ensures our batteries incorporate the latest electronics and software for optimal power management, safety, and effective communication of battery data.

With state-of-the-art manufacturing facilities in Finland, Germany, the United Kingdom, Bulgaria, and China, Celltech leverages extensive market experience and a technology-neutral approach to deliver safe, innovative, and high-quality power solutions that improve servicemen's performance.

WHY CHOOSE CELLTECH?

- **Nordic Heritage:** A stable, financially robust company, part of a Swedish stock-listed entity with over a century of history.
- **Decades of Expertise:** 40 years in the battery industry and over 30 years dedicated to defense batteries.
- **Top-Tier Supplier Network:** Access to Tier 1 cell and component suppliers globally and throughout Europe, with a strong presence in the Nordics.
- **European Product Footprint:** The ability to provide products with European manufacturing and components ensures quick response and reliability of the supply chain.
- **Defense Industry Acumen:** Deep understanding of military standards, norms, and requirements.
- **Certifications:** Comprehensive industry-required certifications in place for quality and security.
- **Security and Confidentiality:** Robust IT security measures, protection of intellectual property rights, and strict product confidentiality protocols.
- **Scalable Production:** Flexible and scalable manufacturing capabilities across multiple European locations.

COMPREHENSIVE BATTERY SOLUTIONS FOR MISSION-CRITICAL OPERATIONS

Supporting military, defense, and public safety teams—including EMS, law enforcement, and fire departments—Celltech designs and manufactures batteries for a wide range of demanding applications, including:

- C5ISR (Command, Control, Communications, Computers, Combat Systems, Intelligence, Surveillance, and Reconnaissance)
- Land Systems
- Aviation and ground support systems
- Offshore and Naval Systems
- Weapon Systems

Contact us to learn more about how Celltech, a stable and long-standing Nordic battery supplier, can equip you with the right battery solution, no matter the size or type of your military equipment.
