BNS Nordic Shelter AB

BNS Nordic Shelter AB is a privately-owned company that develops, markets and sells container and shelter solutions, including tents, to customers with high demands in Sweden, Denmark and Finland.

We offer customized turnkey container and shelter solutions in different sizes and configurations. Our products can be used for a variety of functions for Defence, Civil Defence and Industrial purposes. BNS Nordic Shelter can supply single special containers/shelters as well as containers and tents combined in for example Camps. Among our products you'll find expandable 2in1 or 3in1 containers, hooklift containers, Rapid Deployment Shelters and Hazmat containers.

Through an exclusive distributor agreement with our partner Utilis we supply tent solutions to the Scandinavian market.

We work through the process all the way from requirement specification, design and ILS to finished product. Delivery often includes documentation, training and spare parts. Production takes place internally in the BNS group and with our partners in Norway, Estonia and France. We have realized that every challenge has a solution through close collaboration with our clients, engineers and the production team. Among our customers you'll find for example FMV, MSB and Saab.

CBJ Tech AB

CBJ Tech AB was founded in 1997 and is located in Kungsbacka, Sweden. The founder, president of the board and managing director, Mr Carl Bertil Johansson, after whom the company is named, has over 40 years of experience of small arms and ammunition development in both Sweden and USA.

We conduct research and development of small arms and small arms ammunition, which is offered for license production. CBJ Tech AB is not a manufacturing company, however we do manufacture smaller test lots of ammunition and weapon prototypes. Our target group is the defense and law enforcement sector.

Our greatest asset is a highly competent staff that has all necessary means to work efficiently. We have a well adapted test facility comprising flexible cartridge loading equipment for smaller test lots, a mechanical shop and a well equipped ballistics laboratory where we conduct extensive in-house testing. For full range and field testing, we also have access to military installations.

Because CBJ Tech AB is authorized to develop and possess most types of weapon systems up to a caliber of 40mm, our engineers have a high degree of freedom and opportunity to closely study, compare and evaluate different systems and technologies which has greatly aided our own development programs. Our main products are currently in an advanced stage of development where they are waiting to be qualified and prepared for mass production.

Company name:	CBJ Tech AB
Address:	Hantverksgatan 28
Zip Code and City:	434 42 Kungsbacka

CNC Quality AB

CNC Quality is an engineering company in Karlskoga, Sweden specializing in precision cutting and machining of metal. We are rooted in the engineering tradition in Karlskoga, a town that has a long standing as a center of advanced defense industry.

CNC Quality manufactures both prototypes and series. The work is done with advanced processing equipment from the best manufacturers in the world. We work in steel, aluminum, stainless steel, magnesium and several other metals.

We work hard to be a company in the forefront - responsive to technological development and the needs of our customers. Several of our customers are major players in areas such as the automotive and defense industries with extremely high demands on its suppliers. The experience we have built up is not easily transferred to a file or a hard drive but stays in the head and hands of our employees. Our employees are our customers greatest asset.

Karlskoga is a Silicon Valley for Swedish engineering companies. We collaborate, compete and - not least - let ourselves be inspired by each other."

HAMMAR Defense is a product series of HAMMAR sideloaders for government activity such as the defence industry, rescue services etc.

Military logistics involves the planning and execution of support measures provided at the most effective times to various military units. Containerization represents an important step in modernization of the world's military forces, covering new solutions such as command centres, anti-aircraft containers, hospital containers and the like. HAMMAR Defense products are therefore a highly effective tool, given that HAMMAR sideloaders can handle an ISO container and container platform weighing up to 60 ton in total (official world record for a sideloader according to Guinness World Records as at 27-06-2011) in 3.5 minutes. HAMMAR Defense products are modified according to the customer's wants and needs, to ensure that he is always prepared and ready to take care of the tough assignments which come his way.

Company name:	HAMMAR Defense

Hilleberg the Tentmaker AB

In the backcountry, having the right shelter is crucial. For over 45 years, Hilleberg has specialized doing only one thing and doing it well – making that “right shelter” by building the highest quality tents that offer the ideal balance of low weight, extraordinary strength and remarkable comfort. Conceived and developed in northern Sweden, all Hilleberg tents go through rigorous, real world testing before they are brought to market, and have become the first choice for expeditions and adventurers around the world.

Since its inception, Hilleberg has worked closely with various European special forces. Company founder Bo Hilleberg served in the Swedish “Mountain Hunters,” a special unit whose members were trained to operate, unsupported and individually, behind enemy lines, in all weather conditions. This experience helped both to forge the Hilleberg tent concept, and to guide the company’s philosophy that highest quality and absolute function are the most important Product.

Marine Jet Power AB

Marine Jet Power is a leading supplier of waterjet propulsion systems, the first in duplex stainless steel mixed flow waterjets and a leading supplier of waterjets for large, military landing craft – a force to trust©.

From Small Craft to Ships

The design and quality provides outstanding performance and reliability for the toughest military applications as well as luxurious yachts requiring smooth and quiet power.

The technology covers lightweight aluminum axial flow waterjets in the 250 mm to 575 mm range, and heavy-duty duplex stainless steel mixed flow waterjets in the 350 mm to 1,550 mm range, together with an extensive range of waterjet automation and control systems.

The propulsion systems are delivered complete with waterjets, steering system, training and after sales support. The design, quality, performance and environmental aspects of the waterjets lead the industry.

This is the reason why Coast Guards and Navies in 35 countries have chosen Marine Jet Power.

Company name:	Marine Jet Power AB
Address:	Hansellisgatan 6

Micropol Fiberoptic AB

Micropol is a manufacturer and innovator of passive fiber optics. Since the beginning of 1990, have we developed products in passive fiber optics for the Swedish Armed Forces. We are known for our short leadtimes, high quality and customized application. Regardless of the application, we have the knowledge and the capacity to manufacture the product needed – either according to the customer's specification or as a specially tailored solution. All our products are manufactured in our own facilities in Åled outside Halmstad. We are one of Sweden's oldest and most experienced companies within the field of passive fiber optics. Our first-class production facility includes clean room production, warehouse facilities and engineering capabilities. We have a staff of 24 employees, of whom 16 are in production. Annual turnover is 60 million.

Our customers are found in a large variety of markets where advanced fiber optic solutions are crucial. Our products are used in a whole range of technologies, from and military applications and complex fiber optic networks for telecom and data communication, to advanced systems for industrial (e.g. mining, forest and offshore) and medical sensors.

Company name:	Micropol Fiberoptic AB
Address:	Älvdalsvägen 4
Zipcode and City:	313 50 Åled
Homepage:	http://www.micropol.com
Phone number:	+46 (0)35 17 85 39
E-mail:	info@micropol.com

MilDef AB

From compact computers and power products, to switches and intelligent displays, MilDef provides a complete product portfolio for rugged IT. With the ability to heavily customize products and to deliver complete functional systems, we aim to be your first choice for rugged electronics.

MilDef's products are proven on land, at sea and in the air with international forces around the world, in extremely demanding environments.

Our customers range from military end users and defense material administrations, to integrators, system houses, and other defense companies.

Company name:	MilDef AB
Address:	Box 22079
Zip code & City:	250 22 Helsingborg

E-mail:	info@militarywork.se

MIPS AB

MIPS is a company that specializes in helmet-based safety and brain protection and is a world-leader in this area. Based on an ingredient brand model, the MIPS Brain Protection System (BPS) is sold to the global helmet industry. The solution, which is patented in all relevant markets, is based on 20 years' research and development together with the KTH Royal Institute of Technology and the Karolinska Institute in Stockholm, Sweden.

The MIPS BPS is designed to add a protection in helmets against rotational motion. Rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration). This rotational motion results in shearing and/or stretching of brain tissue which affects the brain and increases the risk of brain injuries from impact.

The main component of the MIPS BPS is the MIPS low friction layer, which imitates the brain's own protection system and enables a relative motion between the head and the helmet. MIPS is an abbreviation for Multi-directional Impact Protection System and the MIPS BPS is designed to work with any impact from any angle.

MIPS BPS is easy to implement in both new and existing helmet models and is sold to the global helmet industry, which integrates MIPS BPS in their helmets. This means that the helmet industry can sell a helmet with a potential protection against rotational motion, thereby differentiating the brand and creating added value.

Company name:	MIPS AB
Address:	Källtorpsvägen 2
Zip code and City:	183 71 Täby

Spuhr i Dalby AB

Spuhr i Dalby AB designs and manufactures superior mounting solutions and weapon upgrade kits in close cooperation with end users and industry partners. The leading name in scope mounts, the Spuhr® **Ideal Scope Mount System™** (ISMS™) revolutionized the design and functionality of the soldier weapons platform, increasing operational capabilities and improving ergonomics whilst minimizing carried weight.

With the introduction of the **ISMS™**, Spuhr® also introduced the Spuhr® Interface, which offers unrivaled repeatability and which can be implemented for applications where other common weapons interface systems cannot be used.

Spuhr i Dalby AB was founded in 2007 and continues to be the leader in the field with products being used by law enforcement, military, and civilians around the world.

Woolpower AB

Since 1972 garments from Woolpower are produced and designed in our own factory in Östersund, Sweden. The garments are made from our own developed material Ullfrotté Original. This material, a blend of 2/3 fine merino wool and 1/3 of synthetic fibre has a unique terry knit structure with heat insulating loops that easily transport moisture away from the skin. Ullfrotté Original has been developed to take the optimum advantages of the wool properties while reinforcing this otherwise quite delicate material with synthetic fibre for increased durability. Wool has a natural ability to combat odour, but when the time comes the garments are washable at 60°C. Woolpower is used worldwide by Defence forces, Civilian Security, Professionals, Athletes and Outdoor Enthusiasts as well as others who like being able to go outside without freezing.

Company name:	Woolpower AB
Address:	Chaufförvägen 29
Zip code & City:	831 48 Östersund
Homepage:	www.woolpower.se
Phone number:	+46 63 14 85 20
E-mail:	info@woolpower.se

WorkCon AB

Turnkey container solutions.

We offer everything from standard equipped containers to advanced custom builds.

A container where your wishes and needs are in focus.

WorkCon AB is a company with offices in both Trelleborg down south and Bräcke up north Sweden.

We understand customers' needs and see solutions where others may see problems.

Characteristic for us at WorkCon is that we are innovative, perceptive and deliver complete container solutions.

Our containers are carefully designed according to customers' requirements and are of the highest quality.

Since a container with its mobility can be shipped worldwide by, for example, car, boat or truck, there are no barriers regarding its geographical applications.

We have a solution for a global market.

ÅF Technology AB

Since the 1950s, we regard the ability to identify and communicate trends, new ideas and new concepts at home and abroad as an integral and natural aspect of our work as defence consultants. We help to transform the visions of clients in the defence sector into concrete proposals and recommendations which they can present to the manufacturers and producers with whom they work. The Swedish Armed Forces call upon our services as an independent consultant to analyse a variety of problems, assist with procurement and evaluate proposed solutions. Projects vary from broad-based and sometimes theoretical analyses to detailed specifications of requirements, technical calculations, security analyses, network planning, installations planning, project management, testing and functional verification, training and documentation.

Company name:	ÅF Technology AB
Zip code & City:	169 99 Stockholm
Homepage:	www.afconsult.com
Visitor address:	Frösundaleden 2 A
Phone number:	+46 10 505 00 00
